

Apple Environmental

Meth Decontamination Services Marketing

Course Introduction:

Whether you are adding Meth Decontamination Services to your existing remediation or crime scene business or starting a new business focusing on Meth Clean Up services, getting the phone to ring is paramount to a your success. Learn how to create a referral army and expand public awareness to the hazards involved with meth contaminated properties both meth labs and user sites. Success also depends on efficient decontamination protocols to help boost project turn around and increase profits.

Course Description:

In order to complete a meth decontamination job first you need to have clients—part of this course will focus on marketing your new services and how to educate your new army. The marketing portion will address creating a presence with your website/SEO, creating CE classes, teaching home inspectors proper testing procedures, networking with other businesses, city and state officials, insurance agents, property managers, and real estate investors. Apple Environmental's half-day course also teaches you the latest in effective decontamination utilizing Apple Environmental Meth Remover® and focusing on the latest scientific data and most effective process.

Trainers:

Kameron Thorne and Mark Shepard are Certified Decontamination Specialists working daily in the meth decontamination industry. Kameron has a background in business coaching, marketing, quality control, as well as decontamination. Mark specializes in business management, business development, and is our decontamination guru.
